Technology, Media and Telecommunications

The Technology and Telecommunications product suites bring together customer care, operations, order management, and partner ecosystems so that technology and telecommunications service providers can scale their business to capitalize on the fast-growing "everything-as-a-service" opportunity.

Technology

Bring together customer care, operations teams and partners to deliver seamless experiences and improve operations across the technology value chain.

Telecommunications

Unite ordering and assurance on one platform for a seamless experience and visibility for communications service providers.

Telecommunications

The ServiceNow Telecommunications products make work flow better across the value chain by connecting service delivery, customer care, and operations workflows on one platform.

Order Management

Capture, manage, and fulfill customer and external service orders.

Telecommunications Network Inventory

Build and monitor your physical, logical networks, and provisioned services.

Telecommunications Service Operations Management

Proactively monitor the health of your networks and services to prevent downtime.

Telecommunications Service Management

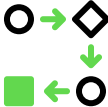

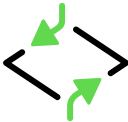

Learn how your entire telecommunications operations are connected via a single platform to deliver proactive care and maximize service quality.

Telecommunications Service Management

Telecommunications Service Management connects your entire telecommunications operation, from network to customer, with one platform to deliver proactive care and maximize the availability and quality of service.

Telecommunications Service Management includes the following applications:

Technology Provider Service Management

ServiceNow® Technology Provider Service Management connects your entire technology operation, from network to customer, with one platform to deliver proactive care and maximize the availability and quality of service.

Technology Provider Service Management includes the following applications:

Account Lifecycle Events

Provide a structured, onboarding experience for technology industry providers.

Proactive Service Experience Workflows

Deliver end-to-end workflows to resolve network related incidents, and proactively notify impacted customers.

Service Bridge

Help customers and providers connect and track service requests directly between their instances.
